NEW RELEASES

Buku *Pengenalan Kepada Rekreasi Luar* ini menyentuh perkara asas dan menyeluruh mengenai rekreasi luar, terdapat juga cabang-cabang yang jarang diketahui iaitu perihal risiko dalam rekreasi luar, interpretasi persekitaran dan rekreasi luar untuk golongan istimewa. Oleh itu, buku ini sangat sesuai sebagai buku rujukan kepada pelajar dalam bidang rekreasi luar dan bidang-bidang yang berkaitan dengannya.

Umum yang tidak begitu mengetahui mengenai bidang ini juga akan mendapat manfaat apabila membacanya. Semoga bidang ini menjadi detik permulaan dan galakan untuk menghasilkan lebih banyak penulisan buku dalam bidang yang sangat berguna dan penting untuk kesejahteraan alam dan manusia.

Buku *Projek Pemerkasaan Komuniti Berdasarkan Alam Sekitar* ditulis berdasarkan pengalaman ahli akademia yang terlibat secara langsung dalam menjayakan projek pemindahan ilmu bersama kelompok komuniti yang berbeza. Pelbagai pendekatan pemindahan ilmu yang dilaksanakan bagi mencapai objektif yang disasarkan.

Pendekatan yang dipilih bergantung kepada kelompok sasaran komuniti di mana pendekatan bagi projek bersama orang awam adalah berbeza dengan pelajar sekolah bagi memastikan ilmu yang dipindahkan mampu dicerna dan diamalkan.

Meskipun pendidikan yang melibatkan subjek berteraskan patriotisme bagi memantapkan semangat cintakan negara telah lama wujud dalam sistem pendidikan negara kita, namun matlamat tersebut seolah-olah tidak tercapai secara menyeluruh. Hal ini terbukti melalui laporan media mengenai isu semasa yang menggambarkan kerapuhan serta kelunturan semangat patriotik warga

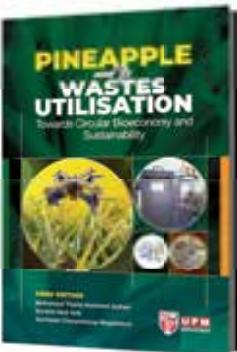

terutamanya generasi muda. Umpamanya isu kritikan dan penghinaan terhadap institusi beraja, agama Islam, lagu kebangsaan, bendera negara dan bahasa kebangsaan. Sehubungan itu, pendidikan patriotism yang bertindak sebagai salah satu mekanisme penting untuk memantapkan patriotism generasi muda khususnya pada pelajar perlu dikaji semula.

The concerns of sustainable development have encouraged efforts toward increasing the efficient utilisation of agricultural by-products as alternative usage for a range of bio-based products from low to high value products.

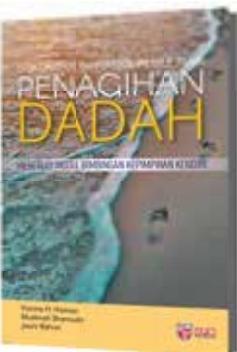

Pineapple is one of the most familiar tropical fruits widely cultivated around the world for its fruits. Pineapple leaves, the major part of the plant that is currently used need global

attention for its commercial exploitation. After fruit harvesting at the plantation and fruit processing at the factory, a range of by-products were produced.

This book on forest therapy is to share some insight and work related to forest therapy in Malaysia. This book consists of 10 chapters, each part focusing on a different point of view of our current work in forest therapy. As we know, Malaysia is blessed with beautiful tropical forest and many forest parks and green areas which are suitable for forest therapy.

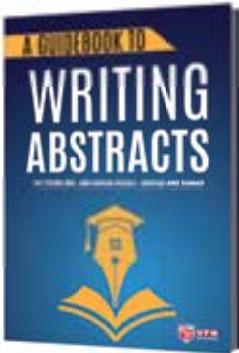

Through this book, we hope the understanding and interest on the benefit of forest therapies will increase.

Summarising an entire study in a few hundred words that give a clear yet concise overview covering all important aspects of the study is no easy task. That is what an abstract seeks to accomplish. With that, how would you go about deciding which pieces of information to include, the appropriate words and phrases to use in conveying such information effectively, and how to best organise and structure the information given in

a coherent and cohesive manner?

The Five-Move Framework for Writing Abstracts, a comprehensive and detailed framework providing the structural foundations of an abstract one section at a time. Each major move in this framework is thoroughly described and elaborated upon in this guidebook, with relevant and practical examples given from high quality journal articles to further illustrate each move.

The Robots Operating System (ROS) is one of the fastest-growing open-source platforms for Robot system development. However, ROS is limited to indoor robot applications. As such, outdoor robot applications such as open-field agriculture, search & rescue, ect, cannot benefit from ROS. This book investigates the reasons behind this and presents a solution. The book first introduces ROS and the role it can play for

Agriculture, then it explains the technical reasons why ROS is limited to indoor applications. It then presents a set solutions and additions to update ROS and expand its reach to Agriculture automation and other outdoor robot applications.

Streptococcosis is an important disease of fish. It is commonly observed in freshwater fish although marine fish have also been reported to suffer from the disease. It is caused by bacterial species from the genus streptococcus and has been reported in many countries, especially in the regions that extensively practicing aquaculture as the main protein source, such as Asia, Middle East and South American. Many species of Streptococcus

have been associated with this disease, but streptococcus agalactiae and S. iniae are the most frequently isolated species from diseased fishes.

Air pollution has been an issue that the modern world has resolved to a greater extent, it still appears to have considerable influence on the global environment. In many countries with ambitious economic growth targets the acceptable levels of air pollution have been transgressed, resulting in an urban skyline characterised by smog and dust clouds.

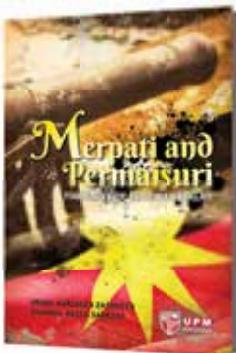

This book provides a comprehensive compilation of chapters, in which the investigation of size

segregated atmospheric particulate samples and their elemental analysis, meteorological influences on them in several cities in Malaysia, are reported. The book consists of eight chapters mainly consist of chapters describing the research findings in air quality monitoring and elemental analysis in three cities in Malaysia. The book seeks to provide reference materials and information to environmental scientists, engineers, researchers and students with the air

pollution case studies in these Malaysia cities in previous years.

A story will remain a tale if left untold and neglected. This was the sole motivation for the authors to compile, at least for them in their times were their bedtime stories from their greatgrandparents to their grandparents passed for generations. This book as many Sarawak Malay can relate to, most people knew about the history, but, their only half of the stories.

This book like any other folklore books, has their

own fantasy. What is fantasy without its legend. The Legend of Merpati dan Permaisuri. The authors documented the narrated histories and collection materials that brought us back to the earlier years of how it all began. It came to their virtue to collate into a book for our future generations to hold onto their roots.

Persoalan politik, etnisiti dan peradaban dalam konteks Malaysia pasca 2020 terus menjadi pokok perbahasan yang masih belum menemui titik noktahnya. Pelbagai isu berbangkit dihadapi oleh negara dalam menelusuri cabaran pasca 2020 dalam persoalan ini yang seringkali dibahaskan dari sudut pandang ilmu yang berbeza-beza.

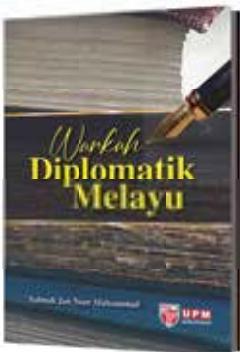

Berdasarkan kepada Sembilan cabaran dalam

Wawasan 2020, Malaysia akan menjadi sebuah negara maju beracuan sendiri yang kukuh dalam aspek politik, etnisiti dan peradaban. Namun, impian ini dikatakan jauh daripada kenyataan selepas berlangsungnya Pilihan Raya Umum ke-14 (PRU-14) pada 2018 lalu. Keadaan menjadi lebih kritikal apabila berlakunya krisis politik dan krisis kesihatan awam terburuk di negara pada awal 2020 serentak.

Warkah berhias dan warkah emas adalah antara dokumen tinggalan sejarah yang sehingga kini masih boleh diakses di institusi-institusi yang menyimpan khazanah warisan bangsa di seluruh dunia. Pada zaman kesultanan Melayu dan wujudnya sistem tulisan, warkah menjadi medium perantaraan utama dengan kerajaan-kerajaan lain dan juga gabenor dari Eropah. Warkah mempunyai

struktur penulisannya tersendiri dan dihiasi dengan ilustrasi menarik yang terdiri daripada alam flora, haiwan dan juga cakerawala. Menerusi buku ini, pembaca akan dihidangkan dengan pengenalan kepada warkah yang menyentuh mengenai komponen, elemen dalaman dan fizikal, peranan jurutulis istana dan penelitian berkenaan warkah.

Buku ini merupakan koleksi tulisan Ratna Roshida Ab Razak yang telah diterbitkan dalam akhbar dan majalah. Perbincangan utama buku ini banyak berkisar tentang cabaran yang perlu dihadapi oleh bangsa Melayu dalam proses pembinaan tamadun Malaysia khususnya di era pasca pandemik COVID-19 ini. Pelbagai aspek dan masalah cuba disentuh untuk dirungkai dan dicari jalan penyelesaiannya.

Buku ini dianggap penting kerana ia menyediakan panduan atau manual bagaimana untuk memaknakan kehidupan yang sementara ini dengan terbaik dan menjadikan setiap individu dari rakyat Malaysia sebagai aset dan pemain utama dalam pembinaan tamadun Malaysia.

Kata dan Rupa adalah sebuah naskhah Melayu yang mengandungi himpunan lukisan yang bersumberkan peribahasa Melayu. Dengan kata lain ia merupakan pengukuran peribahasa Melayu dalam bentuk seni tampak. Lukisan ini diolah daripada pengamatan dan pemerhatian penulis/pelukis terhadap naratif dan jiwa Melayu yang kian lama terbelenggu dalam arus pembangunan. Watak yang ditonjolkan adalah

intipati kepada budaya dan adat resam Melayu yang menjadi bahasa silam khazanah bangsa. Buku ini diharap akan menjadi panduan dalam memahami peribahasa Melayu secara tampak dan menjadi pemangkin dalam memahami dan menerokai inti-pati khazanah budaya dan warisan bangsa.

Advances in sustainable manufacturing are based on six different elements which are reduce, redesign, reuse, recover, remanufacturing, and recycle. Over the last few decades, the issue on sustainability has shown substantial growth and become the essential areas in many engineering and industrial applications. Although the growth is there, there are still a gap that can be seen between

the theory and practice when it arrives at the holistically integrating sustainability.
